

As a 23 year veteran of commercial radio, I was appalled with the decision to allow multiple station ownership within any broadcast market. My employment opportunities were completely cut off with that bad decision. My listening choices have been severely damaged, and I feel that decision has contributed to the utter decline of the radio industry. Please, re-regulate, the way it was in the 70's. I feel we've been sold out to big business, and that we, the people, have no friends within our own government.

I spent 5 years at WSU learning a trade that no longer earns me a living, and has left me with a bitter legacy, and I saw it coming. I knew my career was doomed when you sold me out. I am unemployed, with no hope of work the way things are now. Please change it back, and get Entercom, Gaylord and all the others the h\*\*\* out of my town!

Thank You  
Scott A. Orton
